

MM9

Welcome to the dimension of cleaning 4.0!

 **FIMAP**[®]

MMg

Quality you can see for yourself: a design that's a pleasure to look at, which accentuates every single detail

The precisely defined forms of the front give the machine a decisive character exuding an impression of unrivalled robustness.

Taking pride of place at the lower part of the front is an elegant, elongated front fascia between 2 LED headlights creating a boldly expressive look.

The clean, flowing lines continue to the rear of the machine, lending a sense of dynamism to the whole and underscoring the exclusiveness and attention to detail of the design.

The design is complemented to perfection by materials selected and used according to the most exacting standards, making a bold visual statement that expresses the essence and extraordinary quality of this machine.

A painstaking development and design process gave shape to a machine body that encompasses and protects all the mechanical parts of the machine, covering and shielding them against damage from accidental impact

This maximizes the durability of the components, keeping the value of the machine itself high over time

The entire outer structure is made from robust and sturdy high density polyethylene

Any minor knocks during use are absorbed completely by the integrated bumpers

The rounded design of the body protects the machine and keeps the value of your investment over time

The low centre of gravity ensures outstanding stability when working and manoeuvring, even in bends or when climbing ramps

The compact height facilitates access to the tanks, making maintenance easier and more practical

MMg

COMFORT

Padded in soft material, the seat boasts ergonomic forms offering effective back support and also features forwards and backwards adjustment. This equates to a stress-free experience for the operator, who can work for hours on end without any effort

Boasting FNC and Eco Mode technology, the MMg can also work extremely quietly when needed, to safeguard the health of the operator and of any people nearby

YELLOW COLOUR-CODED PARTS

Parts which must be cleaned regularly at the end of every shift are colour coded in yellow for easy identification, saving time and making sure that your scrubbing machine is kept in perfect condition at all times

SERVICE LIGHTS

The exclusive lights pack offers increased visibility of the parts which could require operator inspection, illuminating the relative zones with LED lights

Ergonomic forms optimized for total freedom of movement and maximized operator comfort

The lateral paddles offer the operator even greater control over the machine, for total peace of mind and a comfortable, safe driving experience

The design of the front maximizes the room for the legs and brings the steering wheel closer to the operator, making the machine even more comfortable to use

The footrest zone is designed to offer impressive space for the feet despite the compact dimensions of the machine

The lowered footboard facilitates access from both sides and allows the operator sit easily without any efforts

PERFORMANCE AND PRODUCTIVITY

POWER MODE

When more scrubbing power is needed, activating Power Mode increases the delivery rate of detergent solution and boosts brush pressure and vacuum power for the time necessary to tackle heavy duty cleaning

ZONE PROGRAMS

To ensure the desired cleaning results in all conditions and prevent the risk of tampering, the site supervisor can save a number of separate configurations with specific cleaning parameters for different work environments. The operator simply has to select the zone to be cleaned, and the machine is configured automatically with all the right settings

REAR VIEW CAMERA

Lets the operator monitor cleaning results in real time from the display, without taking his or her eyes off the direction of travel

A LATERAL BRUSH FOR EVEN MORE GREATER PRODUCTIVITY

The third brush moves laterally to facilitate cleaning along walls or shelves, increasing productivity by up to 15%

The strengths of the MMg behind its extraordinary performance

3-stage vacuum motor
Effective vacuum system which leaves the floor dry with no risk of slipping

FLR-FIMAP LONG RANGE
Increases productivity by up to 70%

Great autonomy
It works more than 4 hours non-stop

Light steering for even more operator comfort

The dual front wheel reduces the specific pressure exerted on the floor, making the steering action lighter. This solution also increases manoeuvrability and prevents marking, even on the most delicate floors

Up to 100 Kg of pressure

With a brush pressure settable to up to 100 Kg, the machine can tackle even the most stubborn dirt

Outstanding performance in any situation

MMg is capable of climbing ramps up to 18%*. A special electronic control modulates power precisely, allowing the machine to climb ramps easily and smoothly, with no interruption or loss of power delivery

RAMP UP

Save time by working faster

Up to 6 Km/h in work mode and 8 Km/h in transfer mode

* Trailer ramp empty

Sweeps, scrubs, dries and sanitizes in one step

In order to obtain a healthy environment, cleaning must be combined with a sanitizing process.

Once the dirt, both light as dust and solid residues, and adherent, has been removed, the surfaces must undergo a treatment that reduces the presence of pathogens with the use of specific solutions.

Today, most sanitization activities are carried out manually, even in large environments, at very high costs.

Mechanizing this operation is crucial to perform it with method and regularity.

Combing sanitization with cleaning and carrying out the two actions at the same time provides extraordinary advantages in terms of time and cost.

Cleaning and sanitizing at the same time is now possible with a Disinfector scrubbing machine.

MMg scrubber dryer in Disinfector version enables the cleaning of floors and, at the same time, the sanitization of both floors and the surrounding vertical surfaces, in a single step.

This means a considerable reduction in costs, time and labour, which becomes even more significant in large spaces, where the cylindrical version of MMg Disinfector can be used, so as to achieve even 4 actions in one step:

1. SWEEPING
2. SCRUBBING
3. DRYING
4. SANITIZING

For effective disinfection follow the instructions given by the manufacturer of the disinfectant liquid used

THE ELECTROSTATIC TECHNOLOGY

The spraying action uses the electrostatic technology. The electrostatic charge causes the particles of the liquid to repel each other and thus to maintain a constant distance between them, which results in an even distribution. In addition, the charged particles are attracted by the surfaces on which they are directed, which guarantees a 360-degree coverage on each side of an object, without leaving out gaps.

THE SOLUTION IS SPRAYED UP TO 3 METERS

While MMg carries out its usual cleaning activity, the sanitizing liquid is sprayed by groups of nozzles positioned above the tank, and then transported up to 3 metres away in distance and height from the force of two turbines, and by another group of nozzles positioned at the rear base of the machine, intended only for the floor.

MMg

DIRECTIONAL NOZZLES

The spray can be directed according to the needs of the site, by rotating the turbines 180° from top to bottom and 180° from right to left.

SANITIZING SPRAYER

The sprayer allows to sanitize the machine at the end of the shift, taking the solution from the designated tank. During the maintenance phase the operator can spray the sanitizing solution inside the tanks, in the area where the squeegee and the brush are located, on the contact surfaces such as the steering wheel, dashboard and driver's seat.

SEPARATE NOZZLE OPERATION: ON THE RIGHT OR LEFT SIDE

You can choose to activate the spray only on one side or the other, according to the requirements of the specific environment you are sanitizing.

SEPARATE NOZZLE OPERATION: UPPER AND LOWER

The upper and lower nozzles are also independent, allowing you to adapt the activity according to the structure of the environment and avoid wasting solution.

TECHNICAL DATA		MMg Disinfector
Sanitizing solution tank	l	10
Lower nozzles	(no.)	(2)
Upper nozzles	(no.)	(4)

SAFETY

ACTIVE TECHNOLOGIES to prevent accidents

ANTI-COLLISION SYSTEM

The anti-collision system detects obstacles when reversing, helping the operator work in complete safety and protecting the machine

REAR VIEW CAMERA

Facilitates manoeuvres in reverse by detecting obstacles

TOUCH SCREEN DISPLAY

Enhances visibility in dim light

STEERING WHEEL CONTROLS

The steering wheel controls offer the operator even greater control when cleaning, and also improve safety by eliminating distractions and letting the operator keep his or her eyes on the zone ahead of the machine

Safety is paramount

The MMg is equipped with a host of safety systems and features to keep the operator in complete control at all times and work with total peace of mind

LED HEADLIGHTS

Front and rear LED headlights maximize work safety in all conditions

REAR HEADLIGHTS

FRONT HEADLIGHTS

Position lights / Brake lights

Position lights

Reverse lights

Driving lights

On the road to accident-free cleaning

DESCENT
CONTROL

Maintains a constant speed when driving downhill, and prevents sudden increases in speed caused by gravity

STOP&GO

The traction control system, which brakes and holds the machine when the accelerator pedal is released, provides assistance for both uphill and downhill gradients

CRUISE
CONTROL

Control device letting the operator set the required speed

VIDEO
TUTORIALS

Any questions? MMg has all the answers, with tutorials to help the operator in every aspect of the job

ESC - ELECTRONIC
STABILITY CONTROL

Automatically reduces speed when steering without the operator using the brake

PASSIVE SYSTEMS

to help the operator in case of emergency

EMERGENCY
STOP

By pressing a single button the machine stops immediately

EXPERIENCE CONNECTIVITY

Discover the FFM universe and experience
the advantages of being constantly connected,
with My.Machine app!

My.Machine

FIMAP FLEET MANAGEMENT

Watch the video

My.Machine app updates you in real time providing all the essential information to help you keep high the fleet performance. You can see from your smartphone or tablet where your machines are, if they're carrying out the cleaning task or

if any anomaly occurred. You can see the list of the services performed, the charger logs and anomalies occurred, in order to have a complete overview of the health status of each machine.

Keep tabs on your machines remotely when you want and from wherever you want!

GEOLOCATION

It shows on a map the machine.

USE INFORMATION

It's possible to know in what working mode the machine is operating and for how long. Moreover, it provides information about the duration of each intervention and the sq.m cleaned.

HEALTH STATUS

Anytime is possible to monitor the health condition of both machines and batteries to have a clear view of the fleet availability and optimize its coordination.

ENVIRONMENTAL IMPACT

All the data related to the CO₂ produced per intervention are available as well as the water and detergent consumption, in order to take action and improve the performance.

ALARMS

The anomalies occurred are summarized in a list which includes a description of the type of issue, and the date and time of the event. It helps you to have an overview of the improper uses that need to be corrected.

BATTERY RECHARGE

It sums up all the complete and opportune recharges performed, the residual charge and the charge settings. This is an essential set of information to extend the battery lifespan and reduce the related costs.

SERVICES

An overview of the list of the maintenance services performed allows to identify discrepancies with the health condition of the machine in case an anomaly is detected, and to monitor the inspections of the whole fleet.

MMg

ENVIRONMENT

Fimap sustainable technologies contribute to protecting the environment and also encourage and help the user to use resources responsibly, offering many advantages.

Advanced technological solutions offer a reduction in cost per sq.m. cleaned, more working autonomy, time savings and better cleaning results, letting you cover more surface area with the same resources.

The Eco Mode function helps prevent water, detergent and energy consumption by using only the quantities you need and nothing more

START&STOP

When the machine is idle, the brush motor, the vacuum motor*, the traction and the water flow will turn off automatically, reducing costs and emissions. All the functions are reactivated automatically as soon as the operator touches the accelerator again

* In basic versions suction turns off when the squeegee is lifted up

WATER

FLR-FIMAP LONG RANGE

Reduces water and detergent consumption per cleaning operation by up to 66%*. This is a system which recycles detergent solution to increase autonomy: to scrub more sq.m. while using less resources

FSS-FIMAP SOLUTION SAVER

Water and detergent quantities are separately dosed, reducing consumption by up to 50%

FWF-FIMAP WATER FLOW

Ensures uniform cleaning results across the entire working width on the first pass, optimising detergent solution consumption

DISINFECTOR

Reduced consumption of sanitizing solution, thanks to a more efficient distribution given by the electrostatic technology

ENERGY

FES-FIMAP ENERGY SAVER

Reduces energy consumption by up to 35%

LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights. The LED headlights consume much less energy than conventional headlights, offer a longer lifespan and illuminate with a brilliant white light similar to natural daylight

NOISE LEVELS

FNC-FIMAP NOISE CANCELLING

Reduces sound pressure

*Saving calculated on a triple recycling cycle

An extensive choice of configurations to give you the best performance possible in all conditions, on any floor, with any type of dirt and in any environment

DUAL DISC
with 2 disc brushes or
2 pad holders

CYLINDRICAL
with 2 cylindrical brushes and a debris
hopper for small sized solid debris

ORBITAL
With pad

A solution for any requirement

MMg

AVAILABLE IN 2 VERSIONS

Basic

PLUS

OPTIONALS AND ACCESSORIES

OPTIONALS

Front and rear LED headlights

On-board battery charger for quicker, more convenient charging

The third lateral brush increases cleaning performance along walls (available for MMg disc versions)

2 side sweeping brushes increase cleaning performance along walls (available for Cylindrical versions)

Rear/front super elastic wheels, for minimal vibration and increased comfort

FLR-FIMAP LONG RANGE

FFM-FIMAP FLEET MANAGEMENT

FSS - FIMAP SOLUTION SAVER

The Disinfector includes two groups of nozzles located above the tank for sanitizing vertical surfaces and a group at the base of the machine intended for the floor

Sanitizing sprayer to sanitize the machine at the end of the shift (only available with the Disinfector)

ACCESSORIES

A wide choice of disc or cylindrical brushes in PPL is offered, available in thicknesses from 0.3 to 0.9 cm. These offer the perfect solution for dealing with any type of dirt on any floor

Abrasive brushes:

Ideal for heavy duty cleaning on industrial surfaces

Pads

BLACK

Superior abrasiveness for rapid and thorough heavy duty cleaning

GREEN

Ideal for removing dirt from more delicate floors (rubber or linoleum)

RED

Ideal for scrubbing delicate or treated floors, and achieving an instant shine

Rear squeegee rubber blades

33 SHORE (PARA)

For maintenance cleaning of smooth floors

40 SHORE (PARA)

For stubborn dirt on floors with joints

POLYURETHANE

For heavy duty cleaning on industrial floors, even with wide gaps

SERVICES

CONSULTING AND PLANNING

We put our experience at your service, to help you realize the cleaning project perfect you. We suggest you the best solutions to make costs decrease and service quality increase.

SETUP

We can help you set up your machines in order to make them meet specifically the requirements of the sites of your project, allowing you to always have control over costs and results.

AUTHORIZED WORKSHOP NETWORK

Fimap Authorized Workshop network spans the globe, so you can enjoy the peace of mind of finding a professional support wherever your business is.

CONFIGURATION

Your business is unique, only a customized fleet can lead you to better results. We will help you find the configurations that best fit the specific requirements of your cleaning sites, in order to optimize processes and lower costs.

TRAINING COURSES

Fimap Academy offers courses for all levels, from the correct use of machines and technologies, up to the management of sites and tenders, helping you to make your service really competitive.

MAINTENANCE AND REPAIR

For your business to run smoothly it is essential that your machines are kept always operational. Our technicians take care of monitoring the machines health status and know how to intervene quickly and effectively when needed.

FINANCIAL SOLUTIONS

You can choose to use the fleet in different ways. We can advise you on the best financial solution for your business, so that you can get the quality of the Fimap world at the most convenient conditions for you.

DIGITAL FLEET MANAGEMENT SYSTEM

With Fimap Fleet Management everything is under your control. You can have a complete overview of the service provided and find out the improvements that can be made, basing your considerations on real data, always available via the MyMachine app or FFM website.

GENUINE SPARE PARTS

Get the most out of your machines, choose the reliability of Fimap original spare parts. They are designed together with the machines, so they perfectly fit them thus guaranteeing the highest quality of performance.
